3-POINT PTO SOIL CONDITIONER

TRACTOR ATTACHMENT

**TILL, LEVEL, AND
CONDITION...**

Our 3-Point Soil Conditioner is an attachment that pays for itself in a very short amount of time by replacing your hand labor work crew. This versatile unit rakes stones and debris to either side or straight ahead for easy pickup. The aggressive teeth on the large-diameter rotor pulverize soil like an ordinary tiller, with the benefit of faster ground speed. The counter-rotating rotor moves soil ahead of it as it tills, filling in low spots and chewing off high spots. It creates perfect seedbeds and windrows. The 3-Point Soil Conditioner separates rocks, tears up sod, and pulverizes dirt clods. We rake and till deeper than anyone – as deep as 4”.

FEATURES

- Driveline slip clutch protection
- Tungsten - carbide teeth
- Power angling (optional)
- Large solid rubber wheels
- Rubber shields
- Teeth are welded in a spiral pattern

3-POINT PTO SOIL CONDITIONER

TRACTOR ATTACHMENT

The massive 10" rotor gives you the ability to till more aggressively and move more dirt faster.

Self-adjusting slip clutches provide driveline protection from overload caused by rotor contact with immovable material situations and ground contact.
