GRAPPLE ROD BUCKET

SKID STEER ATTACHMENT

DIG, GRAB AND SIFT...

The Grapple Rod Bucket is the perfect piece of equipment to dig or root out and grab difficult material, while sifting out unwanted debris. Replaceable cast shanks with pin-on heat treated replaceable tips adds to the life and economic viability of this machine. Heavy-duty 7/8" rods are spaced 3 1/8" apart so larger items will stay in the grapple while loose dirt or dust falls through. Two heavy-duty independent grapples powered by two 3,000 lb. cylinders, that are shielded to prevent damage, power this monster for the largest jobs.

FEATURES

- Rugged tool great for landscaping, demolition, roots, rocks, brush, debris, and other difficult-to-grasp material
- Designed for digging through the dirt to pick up unwanted material, leaving dirt behind
- Excellent tool for digging and pulling out materials from demolition work
- Clears, combs, and grooms while screening material
- Clear, dig, extract, grab, and sift all-in-one tool
- Protective covers on hydraulic cylinders (standard equipment)
