HEAVY-DUTY DIRECT-DRIVE BRUSH MOWER

SKID STEER ATTACHMENT

CLEAR THE WAY ...

Cut, clear and mulch the heaviest brush, grass, saplings, and trees with the Heavy-Duty Direct-Drive Brush Mower. The heavy-duty, high-flow design can handle the toughest land clearing projects, and trees up to 8" diameter with your skid steer. Industrial deck is reinforced for maximum cutting potential and long-term durability. Open deck design and heavy-duty push bar make quick work of large saplings and small trees.

FEATURES

- Massive 138 lb. oil-bathed bearings with 3.25" solid forged shaft
- Wire wrapping protects shaft seal
- 72" open deck design allows easier cutting
- Direct-drive motor
- Blade rotation is reversible by easily repositioning the valve block

WHAT'S BEHIND THE HEARTBEAT... AND BACKBONE.

The heartbeat begins by using an 6000 Series Eaton Char-Lynn motor made in the United States. This motor is designed for high flow machines with ranges of 30-42 gpm and pressures up to 4,200 psi. The motor also features a valve block brake circuit which stops the blades faster upon shutdown for added safety. The motor is mounted to the direct-drive Bearing Carrier. The 3-1/4" shaft is a one-piece forging, designed specifically to stand up to the heavy use that is typical of a commercial operation. The output shaft is installed with tapered roller bearings pressed on.

The Bearing Carrier is a highly engineered part manufactured from a heavily machined casting. This 138 lb. assembly features a massive 13.8" diameter mounting flange... this is the backbone of the unit absorbing energy while resisting all the loading forces from the blade carrier and the blades. With intention, we selected these components for a specific purpose; this was for increased reliability and safety, translating to worry-free operation in the field.

HEAVY-DUTY push bar is made from tubular steel, so it's stronger and the rounded edges don't bite into trees

FACETTED TOP COVER protects hydraulic motor and hoses from damaging impacts

DIRECT-DRIVE MOTOR
Heavy-duty, durable, simple design, easy to maintain with high torque

OPEN DECK design allows for easy cleaning of debris at the end of the workday

STEP TREADS
non-skid for safety

DIAMOND FINISH is tough and durable protecting your investment for a longer period of time

REAR CHAINS
prevent flying debris

SKID RAILS helps the mower follow the contour the earth for an even cut

HEAVY-DUTY DECK utilizes square tubing and bottom rolled ring to provide superior rigidity in all conditions

Massive, heavy-duty 450 lb. blade carrier with 3/4" steel plate. Carrier stores rotational energy to enable more power at the blade for greater cutting capacity. This design allows the blades to rotate 360° acting as a hatchet. Also features spindle seal protection reducing damage to shaft seal from wire.

HEAVY-DUTY DIRECT-DRIVE BRUSH MOWER

SKID STEER ATTACHMENT

Model	72"
Part Number	901498
Operating Weight	1,850 lb.
Overall Height	30"
Overall Length	85.5"
Overall Width	77"
Deck Thickness	1/4"
Cutting Width	72"
Number of Blades	4 - 5/8" x 5" Offset
Cutting Capacity	8"
Flow Range	30-42 GPM (High Flow only)
Operating Pressure	3,000 - 4,200 psi
Tip Speed	11,000 ft/min @ 30 GPM - 15,400 ft/min @ 42 GPM

Options

Replacement Blade Kit

Factory Installed Couplers (Bobcat only)

Factory Installed High Flow Couplers

Break new trails, clear ditches, construction, property sites, and other overgrown areas.

Open cut-away deck channels material to the center for most efficient cut.
